- Inclusive with Juuko Radio Remote Control as standard
- PPHT Trolleys suits all PPH Model Hoists: PPH080, PPH125, PPH240 and PPH500
- Failsafe brake which automatically engages in the event of a power failure
- Completely enclosed design to withstand harsh conditions
- Plug + Play Compatibility with all Porta Hoist Models
- Variable adjustable Hoist slow speed
- 100mtr range (adjustable)
- Range control
- Standard beam width 75-125mm. Wider beam width available on request.

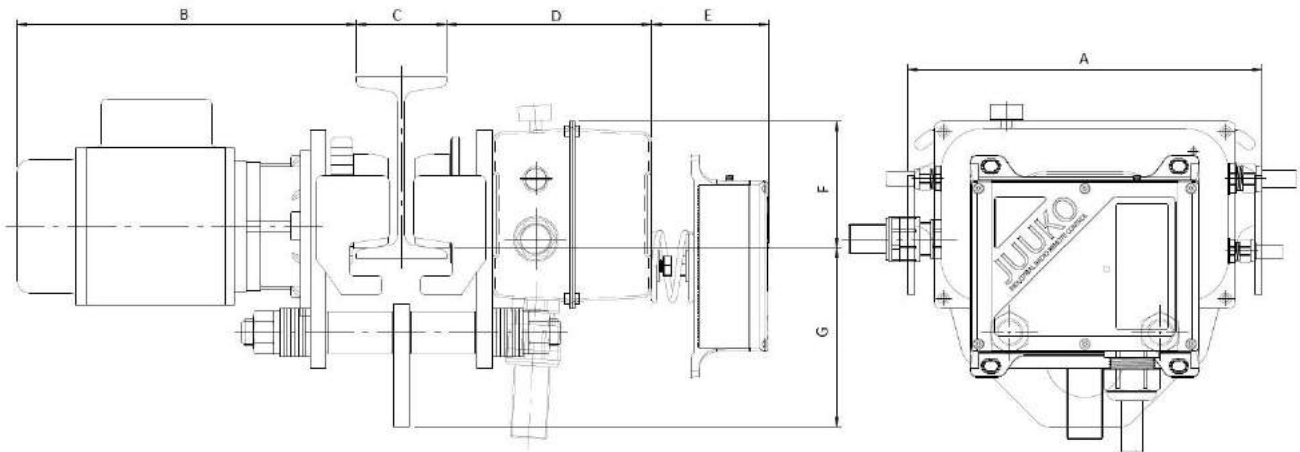

Specifications

Model	PPHT050
Stock Code	PPHT050
Rated Capacity (kg)	500
Speed (m/min)	14
Motor (kW)	0.25 x 6P
Power Supply	Single phase 50 Hz 240V
Beam Width (mm)	75 - 125

*customised Beam Width available

Dimensions

Model	PPHT050
A	294
B	325
C	75
D	173
E	97
F	105
G	148

JUUKO K-SERIES REMOTE CONTROLS

JUUKO is a pioneer in the development and manufacturing of industrial radio remote controls with a clear focus on safety, efficiency and productivity. Their products are used in over 20 countries around the world in the hoisting and cranes industry. The perfect tool for magnetic cranes, overhead cranes, electric chain hoists and tandem operations.

Pacific Hoists is proud to be a JUUKO supplier and the K-Series remote controls are available with all Hitachi, Pacific and Challenger Electric Chain Hoists and Comeup Electric Winches.

The K-Series remote controls are easy to use and provide comfort due to their ergonomic design. The transmitter is constructed with ultra-high impact resistant corner bumpers for added protection and a rubber protective cover underneath the EMO button which is dust-resistant. The back of the remote control features a matt black rubber finish which is durable and offers a secure and comfortable grip.

Features

- Automatic channel switching allows users to select primary
- working frequency and secondary working frequency
- Range limiting function allows reduction of maximum distance
- for the transmitter to continue operating
- Electronic key-code and automatic shut-off option programmable
- to prevent accidental activation of the transmitter
- System automatically changes to another frequency in presence of radio interference
- Eco power management system to save battery life
- Receive and displays via 4 LED signals coming from the receiver (to relay action feedback)
- Mushroom type EMO button
- Internal Bootloader, firmware up date by using a computer
- Wireless pairing procedure by using pendant push buttons
- Independent LED's to indicate the status of battery
- Data logging Black Box system included, which records data and remote usage
