MacBook Air handed on

End of October our Export Sales Manager Espen Gulliksen handed on the Apple MacBook Air to Fabio Somma, FAS S.p.A., Italien, which Mr. Somma had won at our CeMAT Prize Draw.

Fabio Somma, right, was very happy about his MacBook Air.

We wish you a Merry Christmas and a healthy New Year.

Your **J.D. NEUHAUS** Sales Team

Location Shipyards

Compared with electrical hoists JDN Air Hoists have a wide application range. This is an advantage in shipbuilding whether used for the installation of rudder blades, propellers, drive shafts or for general maintenance work.

The advantages at one sight:

- 100% duty cycle, no down-times.
- Capacities up to 100 t.
- Compact design, low weight with easy handling.
- Water resistant.
- Safe and reliable operation.
- Easy maintenance.
- Only mechanical parts, no electrics or electronics.
- Sturdy design for harsh environment.
- Sensitive infinitely variable speed control for precise positioning of loads.
- Under special conditions suitable for oblique pulling.
- Trolleys for traversing.

Mounting a rudder blade with two JDN Air Hoists PROFI 100 TI.

Disassembling a propeller with several JDN Air Hoists PROFI 50 TI.

We introduce: J.D. Neuhaus Pte. Ltd. - Singapore

In 2002 J.D. Neuhaus Pte. Ltd. was founded. Settled in Singapore, ten employees are working in the fields of sales, service and engineering. They are serving the Southeast Asian Area as well as China.
