

## In this Edition:

- Tip of the Month
- PROFI Subsea tested
- Australasian Oil & Gas

## Tip of the Month

JDN – Always one step ahead:

## PROFI Subsea successfully tested

On January 21<sup>st</sup> the company UMC International has extensively tested a prototype of the PROFI Subsea underwater. The result: The PROFI met all the requirements and - apart from a few modifications - was found worthy for the job.

UMC International is specialised in all kinds of maintenance and repairs underwater.

## Australasian Oil & Gas Exhibition 2010

The AOG 2010 will be held in Perth from 24<sup>th</sup> to 26<sup>th</sup> of March. It is Australia's largest Oil and Gas Exhibition and covers the entire spectrum of the Offshore Industry.

At the same time a Subsea Conference will take place. Just the right platform to present the JDN Concept Study of the PROFI Subsea Series.

Concept Study: JDN PROFI 6 TI Subsea

As a further highlight we will introduce the next generation of the JDN Monorail Hoists at the AOG. They are the result of over 30 years of experience in offshore material handling.

New JDN Monorail Hoist EH 25

Some innovations in detail:

- 25% less air consumption
- Lube-free operation
- Less components, low maintenance
- Flow optimised air guidance

At the AOG J. D. Neuhaus will be represented by their long-standing partner for Australia and New Zealand, the company Pacific Hoists Pty. Ltd.

We are looking forward to your visit in the Perth Convention Exhibition Centre, booth no. P1.
