

In this Edition:

- Tip of the Month
- TÜV Certification
- New JDN Low Headroom Trolley
- Reduction of Delivery Times

Tip of the Month

You will find the training dates for 2009 on www.jdn.de. The application forms are also available there.

TÜV Certification

In December 2008 our Quality Management System was certified by the TÜV Rheinland, one of the worldwide leading companies in this field according to ISO 9001.

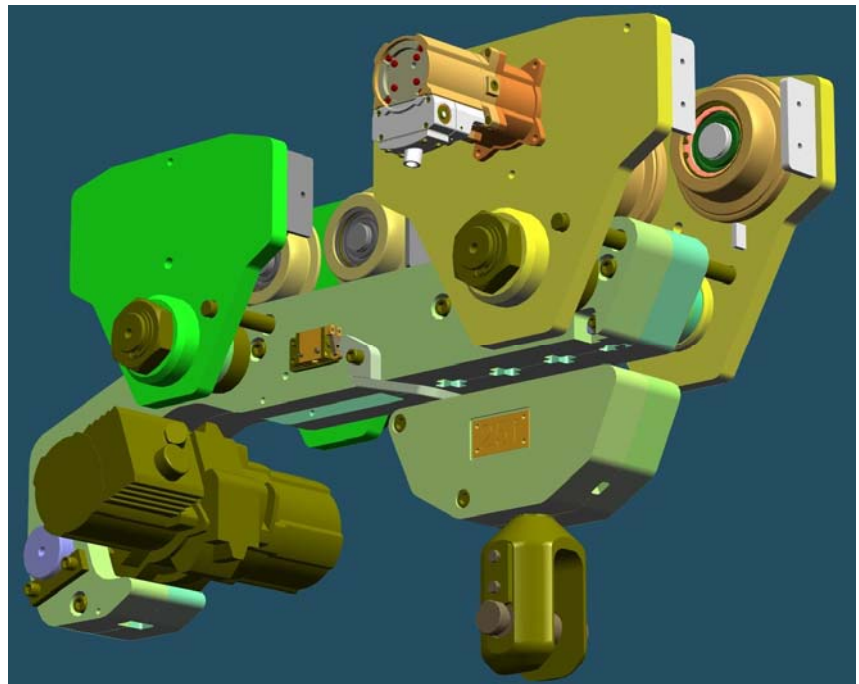

With pleasure we will send you a copy of the certificate.

Questions regarding this newsletter may be forwarded to: marketing@jdn.de.

Your **J.D. NEUHAUS** Sales Team

New JDN Low Headroom Trolley with 25 t Capacity

CAD model of the new JDN Low Headroom Trolley LMF 25 t

Wanted: A Hoist with a carrying capacity of 25 t and a maximum headroom of 685 mm for installation and removal of valve heads. We received this inquiry in December 2008. Due to its too high headroom the JDN Monorail Hoists wasn't a possibility for that

job. Therefore we develop and deliver this new Low Headroom Trolley based on our Profi 10 TI, which meets all demands. We accomplished this job within nine weeks. With that JDN placed a new standard again – powered by air!

Reduction of Delivery Times

Due to extensive projects like the restructure of our high rack store and the introduction of our ERP Software (Semiramis) we had to tackle delivery delays in 2008. These projects have been finished successfully now and delivery times have normalized. In the future you will receive the JDN Air Hoists *mini* and Profi 025 TI – 2 TI within two weeks.
