- OTC 2009
- NEW: PROFI 1,5 TI and 3 TI / 2

Tip of the Month

JDN Air Hoists *mini* Series are available within five working days.

OTC 2009

The 2009 Offshore Technology Conference will be held from 4th to 7th May in Houston. The OTC is the world's foremost event for the development of offshore resources in the fields of drilling, exploration, production and environmental protection. You will find us at the German Pavilion, booth no. 4717-4.

For further participation in trade fairs please have a look in the „News“ area under www.jdn.de.

We are looking forward to your visit.

NEW: JDN Air Hoists PROFI 1,5 TI and 3 TI / 2

JDN Air Hoists **PROFI 1,5 TI** and **PROFI 3 TI / 2** complete the existing PROFI range. According to your demands you can thus choose the right hoist for your special application.

Standard Features:

- **Air pressure range: 4 bar up to 6 bar**
Whether you have an existing air pressure of 4 bar, 6 bar or a pressure within this range: The PROFIs are working safely and reliable over the whole pressure range.
- **Very sensitive control**
The rope and FI control allow very sensitive regulation of the lifting and lowering speeds. Your advantage for smooth start and stop. Alternatively we offer the robust E control.
- **Very reliable**
Proven in long-term tests. JDN Air Hoists PROFI fulfill the required 480 hours with full load without any troubles. To show you the strength: This corresponds to 19.200 load cycles at 3 m HOL with PROFI 3 TI / 2.
- **Lube-free operation**
As all JDN Air Hoists the new PROFI require no additional motor lubrication for a period of 250 operating hours.
