

Porta Lift

The Pacific Porta Lift is a cost effective portable lifting aid enabling one person to safely move up to 100kg from ground level to 1000mm high.

It can be used for loading and unloading work vans, trucks, shelves, benches or anywhere there is traditional bending and lifting required. The Porta Lift's service stand easily converts it into a portable workstation.

Features

- One unique feature of the reverse braking winch enables the load to stop at any position without having to lock or unlock pins or ratchets.
- The unique noiseless reverse braking winch also allows for the weight to be varied over the centre of gravity enabling the elimination of back stress to the user and creating easy handling on stairs.
- The removable platform and service stand allows for easy and compact storage in the back of utes, trucks, 4WD's and vans.
